

Kindergarten Learning Progression Toolkit

Learning Observation Tool Fact Sheet

Acknowledgement of Country

We acknowledge the Traditional Owners of the lands, seas, skies and waterways from across Queensland.

We pay our respect to the Elders past and present, for they hold the memories, traditions, the culture and hopes of Aboriginal peoples and Torres Strait Islander peoples.

A better understanding and respect for Aboriginal and Torres Strait Islander cultures develops an enriched appreciation of Australia's cultural heritage and can lead to reconciliation.

This is essential to the maturity of Australia as a nation and fundamental to the development of an Australian identity.

The Kindergarten Learning Progression Toolkit (KLPT)

The KLPT is a Queensland Government initiative that provides teachers and educators with a formative, child-centered assessment toolkit.

The KLPT supports teachers and educators to use high-quality assessment practices to build children's capabilities across five priority learning domains that align with the Early Years Learning Framework V2.0 and the QKLG. These are:

- Language and Literacy
- Executive Function
- Social and Emotional
- Physicality and
- Mathematics and Numeracy.

The KLPT supports decision-making and planning and helps teachers and educators gather evidence of what children know, can do and understand. It recognises and values children's diverse ways of knowing, being and doing, including the many ways children express themselves, connect with others and make meaning.

The strength-based KLPT acknowledges Aboriginal and Torres Strait Islander worldviews, and centers the importance of culture, traditions, family and kinship in a child's learning. The KLPT is aligned with the Australian Government's Preschool Outcomes Measure (POM).

Teachers and educators can use the KLPT to:

- **Reflect on their practice and pedagogy**
- **Recognise and build on each child's strengths**
- **Intentionally plan meaningful, inclusive and responsive learning experiences.**
- **Celebrate growth over time, in ways that honour identity, culture and community.**

The Learning Observation Tool

The Learning observation tool within the KLPT generates meaningful data and helps to inform 'where to next' in the progression of learning for individual children. It does this by helping teachers and educators identify observable behaviours linked to each learning domain. The tool generates a learning statement, with the option to add context, reflections, and strategies to support each child's ongoing progress.

The KLPT celebrates all progress – no matter how small while avoiding benchmarking or setting fixed expectations for children's starting or finishing points.

How to use the tool

The learning observation tool is point in time assessment for children's learning. It is not for summative assessment or ranking children and should not involve testing or removing children from their everyday play and learning. You do not need to use every progression with every child. Professional judgement is used to select the progressions that best reflect each child's strengths, interests and learning goals.

Learning progressions

The learning progressions are the observable behaviours within the tool designed to strengthen teachers' knowledge, encourage reflection and promote professional conversations about children's capabilities. They support inclusive practice by recognising the strengths of all children, considering how children communicate, move or learn in different ways.

Each learning domain has observable behaviours that have been externally validated through the Australian Council for Educational Research and in consultation with sector stakeholders, partners and users.

Learning Statement

There are four steps for the learning statement:

Step 1: Domains

Select the learning domain you want to record an observation about. Some learning domains contain sub-domains which focus on a particular aspect of the learning area. Domains or subdomains are then split into key elements which help further draw your attention to the core concepts, abilities, or competencies that children develop within each learning domain. You can record observations multiple key elements in the one session.

Step 2: Behaviours

Select the observable behaviours that best fit what you notice about the child. Once you press the next button, a learning statement will be generated that shows the current learning and what the next progression in learning would typically look like to help inform your planning.

Step 3: Learning Statement

Complete the learning statement and observation notes by adding optional information on the context, your professional reflections, intentional teaching strategies and learning opportunities.

Step 4: Review and generate PDF

You can review the statement prior to generating a PDF. In this step you can add the child's name to the learning statement. Once the PDF is generated, you can print or save it in your own observation filing system. Once the PDF is generated, the session is deleted and is no longer available.

Learner code and privacy

A Learner code is used instead of the child's name to protect the identity of the child, ensuring information about their learning progress is not easily accessible to others. In Queensland, the **Information Privacy Act 2009 (Qld)** governs the collection, storage, and sharing of personal information.

Positive Transitions

The KLPT helps teachers and educators make strength-based, intentional decisions aligned with the QKLG to support positive transitions. Using the learning progression tool for formative assessment across the kindergarten year is one way to collect evidence of learning. This can be used to enhance the flow of information that teachers use to complete the end of year Transition Statement.
